Loretto College School

How it all began

While the sod was turned and the cornerstone blessed for this new building in September 1913, classes actually began in the three-story house at the back of the property. The commercial students from 81 Bond Street transferred to "Casa" in October 1913, and the music pupils from 538 Dovercourt Road came in 1914. When the main building opened, Casa became a residence.
